PROFESSIONAL EXPERIENCE

Senior Software Engineer

RVO Health | Fort Mill, SC | October 2023 - Present

- Develop UI for high-impact applications for healthcare companies like Novant Health and United Healthcare
- Build the front-end architectures for several projects using **Next.js & React, Nuxt & Vue, Svelte & Sveltekit, TypeScript, TailwindCSS**
- Collaborate cross-functionally with backend teams to **streamline API integrations** and with product teams to deliver business and UI/UX specifications
- Own release management including version control, stakeholder communication, and deployment strategy
- **Drove regression test improvement initiative, increasing coverage by 60% and building E2E testing strategy from zero to 10+ critical flows**
- Integrated accessibility checks in all E2E tests, ensuring compliance across user flows

Senior Software Engineer

Lowe's Companies Inc. | Charlotte, NC | May 2022 - October 2023

- Engineered **Next.js/React analytics platform** used by Finance & Supply Chain teams, integrating Power BI & Tableau
- Built reusable, high-performance React components improving developer efficiency
- Maintained code quality through ESLint, Prettier, Jest, Cypress, and collaborative code reviews

Front-End & BI Developer

IMPLAN | Huntersville, NC | February 2021 - May 2022

- Developed core features for a **React-based economic reporting platform**, ensuring seamless data visualization, also using **Typescript, MUI, Styled components**
- Created dynamic Looker dashboards with **LookML and SQL**, enhancing real-time business intelligence
- Built, refactored and optimized UI components to UI/UX specifications

Business Solutions Consultant

Softdocs, Inc. | Columbia, SC | May 2019 - February 2021

- Transformed manual business processes into **custom web solutions** for educational institutions
- Developed responsive forms using **JavaScript, Knockout.js, Bootstrap**, and **integrated SQL data**
- Created reusable UI component library, **accelerating development time**, using **Knockout.js custom bindings**

Web Application Developer II

BAE Systems | California, MD | July 2017 - April 2019

- Developed and maintained an enterprise **ERP system for tracking parts logistics**, built on **ASP.Net, HTML, CSS, JavaScript, jQuery, Bootstrap**
- Designed **SQL Server databases, stored procedures**, and optimized queries for performance
- Ensured compliance with industry regulations while modernizing legacy applications
